

TDI / WPI-8 Process

Simple 3-step guide for coastal Texas projects

If your project is in a Texas coastal windstorm area, you may need a WPI-8 Certificate of Compliance.

Oasis Engineering helps guide the process from application to final certificate.

1

Apply Before Construction

Submit the project to TDI before work begins.

WPI-1

Application

2

Build + Inspect

Build the structure and schedule inspections while the work is still visible.

Foundation

Framing

Final

✓ Typical projects need about 3 site visits.

3

Submit Verification + Receive Certificate

After inspections are approved, the engineer submits the final verification to TDI. TDI then issues the certificate.
